(Name of City)**RULES, REGULATIONS AND CONDITIONS OF SERVICE (WATER)****10.00 EXTENSION OF WATER MAINS**

10.01 The Company will extend its water mains in a public street, public road, and other public ways, except alleyways or other public ways having a width dedicated to the public use of less than thirty (30) feet; or in easements within multi-unit building complexes, mobile home parks, or shopping centers when such easements are of a width, form, and location satisfactory to the Company, within its service area on the following terms and conditions:

- a) Upon application being made for an extension of water main, the Company shall determine the necessary size, location, and characteristics of the main and of all valves, fittings, and other appurtenances attached thereto; and shall make an estimate of the cost of the proposed extension including excavation, pipe, valves, fittings, backfill materials, pavement restoration, casing, all other appurtenances and materials; and all other costs such as labor, permits, etc., including the Company's expenses for supervision, engineering, insurance, taxes, tools and equipment, accounting, and other overhead expenses. The determination of the Company with respect to the mains, valves, fittings, and other appurtenances and materials shall be final.
- b) In determining the length of water main to be installed to serve an individual Customer or group of Customers (not a subdivision) the main extension shall be extended across the full frontage of the last lot to which the extension is to be made.

In determining the length of water main to be installed to serve a subdivision, the main shall be extended to fully cover the frontage of the property, and if the last lot to be served is a corner lot or a lot immediately adjacent to a corner lot, the terminal point of the extension made hereunder shall be located so that the main laid hereunder ties in with the existing main located in the intersecting street; provided further that, if there is no main located in the intersecting street, the terminal point of the extension made hereunder in a subdivision shall be located at the nearest street line of the intersecting street.

RULES, REGULATIONS AND CONDITIONS OF SERVICE (WATER)

- c) If the estimated cost of the extension is not greater than one and one-half (1-1/2) times the Company's estimate of the first year's revenue to be received from Customers who will immediately attach to the extension, the Company will make the extension without cost to the applicant.
- d) If the estimated cost of the extension exceeds one and one-half (1-1/2) times the Company's estimate of the first year's revenue to be received from Customers who will immediately attach to the extension, the applicant shall execute and deliver to the Company an agreement conforming to the provisions of this rule, and shall pay in advance to the Company the estimated cost of the extension (less one and one-half (1-1/2) times such estimate of first year's revenue from immediately attaching Customers).
- e) Estimates of annual revenue shall be made by the Company and shall be the average revenue received from similarly situated customers. When there are no similarly situated customers, the Company's estimate of the annual revenue will be based on the anticipated average annual water usage of the Customer as determined by the Company.
- f) Original prospective Customers to be considered in Sections 10.01 (c) and 10.01 (d) above shall be those who sign an agreement for at least one year's water service and guarantee to the Company that they will take water service at their premises within thirty (30) days after the date water is turned into the main and whose regular service connections are directly connected to the mains installed under said extensions.
- g) Should the actual cost of the extension be less than the estimated cost, the Company shall refund the difference as soon as such actual cost has been ascertained. Should the actual cost of the extension exceed the estimated cost, the applicant shall immediately pay the difference.

(Name of City)**RULES, REGULATIONS AND CONDITIONS OF SERVICE (WATER)**

- h) The Company reserves the right to further extend its water mains from and beyond each water main extension made under this rule and the person paying for the original extension under this rule in the manner provided for shall not be entitled to a refund for additional new Customers of the Company attached to any such further extension, except and unless water service was available in the public highway and adjacent and available to the premises and to the structure or other point of service on the premises of such Customer from the original extension made by the Company pursuant to the rule. If the extension abuts property which the applicant does not own or have an interest in, the utility shall prorate the cost of the extension on a front-foot or per lot basis, whichever is deemed to be most equitable for the circumstances involved; and if, during the term of the extension agreement, the owner or occupant of such property requests a water service connection, the utility shall collect from such new applicant an amount equal to his/her pro rata cost of the extension less one and one-half (1-1/2) times the estimated annual revenue to be received from said new applicant. The utility shall refund money so collected to the original applicant, such refund being in addition to the refund provided for in Section 10.01 (g).

(Name of City)**RULES, REGULATIONS AND CONDITIONS OF SERVICE (WATER)**

- i) Refunds shall be made to the party who made such application and paid for such extension for each additional new Customer (other than "Customers who will immediately attach to the extension" as above referred to) who shall attach to and take service from the extension within ten (10) years from the date of completion of such extension provided such additional new Customers shall make application for Regular Water Service Connection and such refunds shall be determined by multiplying one and one-half (1-1/2) times the average annual residential revenue for each new residential customer and by multiplying by one and one-half (1-1/2) times the first year's billing for service to a new commercial, industrial, or other non-residential customer. Refunds for commercial, industrial, or other non-residential customers who will immediately attach to the extension as noted in D above shall be an amount equal to one and one-half (1-1/2) times the difference between the annual revenue originally estimated and the actual revenue received provided the actual revenue is greater than the estimated revenue. If the actual revenue is less than the estimated revenue the difference shall be used as an offset against revenues, which would otherwise become the basis for refund, from additional new Customers.
- j) Total refunds to be made by the Company shall in no event exceed, in the aggregate, the amount paid to the Company by the applicant for the extension.
- k) No interest shall be payable by the Company on the applicant's payment or any unrefunded balance thereof.
- l) All mains, valves, fittings, and other appurtenances or materials installed in accordance with this rule shall be and remain the sole property of the Company.
- m) Extensions made under this rule shall be on the basis of a main size of eight (8) inches in diameter except as follows:

RULES, REGULATIONS AND CONDITIONS OF SERVICE (WATER)

1. Where the applicant's service requirements require a main of larger size than eight (8) inches in diameter, applicant shall advance the entire cost thereof and refunds shall be made to applicant in the manner above provided.
 2. When the Company desires to install a main larger than eight (8) inches in diameter for a purpose other than the applicant's service requirements, then the Company shall pay the additional cost of the larger main. The difference between the cost of the larger main and the cost of an eight (8) inch main shall initially be determined on the basis of the Company's estimate of the cost of installation of the larger main and the cost of installation of an eight (8) inch main. In such cases, the determination of the actual cost of the installation of an eight (8) inch main, for the purpose of determining the payment or refund provided for in Section 10.01 (d) above, shall be based on the following formula:

"Actual cost of larger main installed divided by estimated cost of larger main installed times the estimated cost of an eight (8) inch main installed equals the actual cost of an eight (8) inch main installed."
 3. Mains smaller than eight (8) inch in size may be installed by the Company when good engineering principles indicate a smaller size is acceptable for the service and for the present and future requirements of the service area. The Company will have the sole right to determine whether or not a main size smaller than eight (8) inch is acceptable, based on the criteria described above.
- n) All main extensions under the provisions of this Section 10.00 will be made in accordance with provisions and terms incorporated in these Rules, Regulations, and Conditions of Service.

RULES, REGULATIONS AND CONDITIONS OF SERVICE (WATER)

- o) Any main extension agreement and any right to refund thereunder shall not be assigned by the applicant without the prior written consent of the Company thereto.
- p) Where the applicant, for convenience, desires to construct the required main extension facilities in lieu of making the required cash payment, the applicant shall enter into an Agreement in accordance with provisions and terms incorporated in these Rules, Regulations, and Conditions of Service. All such work by or on behalf of the applicant shall be at the applicant's cost and in accordance with the Company's requirements and approvals, and all such work shall be the property of the Company as installed.

RULES, REGULATIONS AND CONDITIONS OF SERVICE (WATER)

11.00 EXTENSION OF MAIN INCOME TAX LIABILITY

11.01 For the purpose of these rules, regulations and conditions of water service, including, but not withstanding, any rule or regulation relating to extension of Mains, and to give effect to the Tax Reform Act of 1986, as it may be supplemented or amended, and any applicable state income tax, any Customer, developer or other party requesting the extension of Mains for water service is required and shall comply with the following provisions in connection with the other terms and conditions heretofore applicable to the extension of Mains requiring an advance for construction:

- a) NO REFUND PROCEDURE. Any Customer, developer or other party requesting a Main extension requiring an advance for construction may pay only the amount normally required to reflect construction costs, excluding any amount for income tax liability, provided such party waives the right to any and all refunds normally available under the Main extension rule or regulation, subject to any further order of the Illinois Commerce Commission permitting refunds under such no refund procedure.
